

GIMDES Halal and Tayyib Workshops Program 24- 25 October 2015, Istanbul, Turkey

AN OVERVIEW ON HALAL- HARAM RELATIONS OF HEART AND VESSEL SURGICAL ASPECTS IN THE HEALTH APPLICATIONS

Abstract: The process of health applications comes from West so, it includes many Haram sources. Briefly, if we make classifications;

1-Medicine:

a- Including Haram materials in the contents:

Some kind of medicines which is formed as Capsule, the production material of the capsule such as gelatine comes from swine or even if the origin of animal is Halal, the slaughter isn't suitable to Islamic principles.

b- Directly come from Haram source products.:

In addition that the other important topic is whether the necessity usage of medicine for all illnesses (Depression and panic attack).

On the other hand, pregnancy chasing tests and plastic surgeon profession fields must be evaluated in accordance to Islamic viewpoint.

Above and beyond, the diseases in human life have to discuss on Islamic principles. It must remember that the investigation of cure must be suitable for Allah's sake.

2- Animal-Based Sewing Materials.

3-Animal-Based Vascular Grafts

a- Animal Vascular Grafts

b- Heparin covered synthetic Vascular Grafts

c- Connective tissues elements such as collagen-coated synthetic vascular grafts

d- Vascular grafts and tissue engineering studies

4- Covers Heart of Animal Origin

5- Animal-Based Tissue Integrators

6-Locally effective bleeding stoppers

7-Genetically Modified Organisms (GMO)

It isn't a mistake what science do this researches. However, as Prophet (S.A.V) said, " Allah has not placed a cure for your diseases in things that He has forbidden for you," Every disease has its cure, and it must search in the Halal Sources. For this reason, Muslim scientist and Muslim, producers have to work jointly and Islamic based universities, and foundations must be built for this case.
